ROLLY
ROLLABLE STRETCHER

GSE1360

Rollable medical device designed for confined space rescue; suitable for the evacuation of injured personnel from tight and complicated situations. Being extremely flexible allows the device to be used in complex environments, and also to be stored and transported within a bag.

Material Specification
Stretcher: PE
Handles: Nylon

Dimensions
Weight: 7.3KG
Lenght: 245cm
Width: 60cm

Features

- Hanging kits for vertical transportation in wells or tunnels
- Hanging kits for horizontal winching by a tripod
- Increased thickness providing greater resistance to rubbing, user protection and greater stability during use
- Easy maintenance with replaceable components
- Can be used in conjunction with the **HALF ROLLY** stretcher
- Sides handles for easy transportation

150kg
