

# G.Harness

Safety Harnesses

GSE1019-21

Safety harnesses are an essential part of our product range, enabling users to be safely and securely attached to our range of fall arresters, lanyards and personnel winch products. Recommended maximum user weight: 150kg.

Standard size supplied unless otherwise specified.

## Single-Point Safety Harness (GSE1019)

Single-point full body safety harness suitable for general work applications where there is a risk of falling. One rear 'D' attachment point between the shoulder blades. Conforms to European Standard EN361.

## Two-Point Safety Harness (GSE1020)

The two-point safety harness is fitted with front and rear 'D' connection points. The front 'D' connection point has been specifically designed to ensure an even force distribution when under load. Conforms to European Standard EN361.

## Rescue Safety Harness (GSE1021)

Has all the features of the two-point harness but comes with an additional rescue strap for use in confined spaces. The rescue strap allows the user to be rescued and raised in a close to vertical position, which is preferable when recovering a casualty. Conforms to European Standards EN361 & EN1497.
