

# Arrester Bracket

## User Instructions

(Original Instructions)

Issue 01

This bracket enables the G.Saver II or G.Stop models of fall arresters to be securely fitted to a section of 48.4mm diameter.

The anchorage strength requirements stated on the G.Saver II/G.Stop must be maintained.

## Instructions for Installation

Open the clamps and fit the bracket to the tube section and fully tighten.

Undo the top bracket handle to allow the top bracket to open, remove the hand nut from the lower pin and slide out

If installing a G.Saver II product ensure the handle is to the right side to prevent it clashing with the handle of the bracket.  
When closing the top bracket make sure the trigger pin ring is accessible.

Fit the pin through the bracket and the fall arrester, lower the upper bracket and tighten the handle.
