

## NOTIFICATION OF RETIREMENT OF UNITS

Date of Notice: 09/08/21

Please be advised that the units specified below are being **retired from service**. They will **no longer be certifiable from 09/09/21** due to their diminishing circulation.

This means that Globestock and our service agents will not be able to service these particular units after the above date. The change will not affect the majority of Globestock service agents because most of these units will have been retired from service already.

However, due to the durability of these products, please be aware that **a few units are still in circulation**. We have identified some end users who still deploy these older units; those customers will be notified of the retirement very soon.

For retired units possessing certification that expires after the retirement date, existing **certificates will remain valid until expired**.
